DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, 11-13, 16, 18-19 and 23-24, drawn to a polynucleotide and first method of using the polynucleotide.

Group II, claim(s) 10 and 17, drawn to a polypeptide.

Group III, claim(s) 14, drawn to a second method of using the polynucleotide.

Group IV, claim(s) 15, drawn to a third method of using the polynucleotide.

Group V, claim(s) 20-22, drawn to a fourth method of using the polynucleotide.

In addition to electing one from Groups I-V above, Applicant is required to elect one of inventions A-K below:

- A. SEQ ID NO:1 or a sequence encoding SEQ ID NO:2
- B. SEQ ID NO:3 or a sequence encoding SEQ ID NO:4
- C. SEQ ID NO:5 or a sequence encoding SEQ ID NO:6
- D. SEQ ID NO:7 or a sequence encoding SEQ ID NO:8
- E. SEQ ID NO:9 or a sequence encoding SEQ ID NO:10
- F. SEQ ID NO:11 or a sequence encoding SEQ ID NO:12
- G. SEQ ID NO:13 or a sequence encoding SEQ ID NO:14
- H. SEQ ID NO:15 or a sequence encoding SEQ ID NO:16
- I. SEQ ID NO:17 or a sequence encoding SEQ ID NO:18
- J. SEQ ID NO:19 or a sequence encoding SEQ ID NO:20
- K. SEQ ID NO:21 or a sequence encoding SEQ ID NO:22

2. The inventions listed as Groups I-V and A-K do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the

Art Unit: 1638

same or corresponding special technical features for the following reasons: Inventions I and II represent structurally and functionally different molecules. Moreover, the polypeptides may be produced without using the polynucleotides, such as isolating the polypeptides from their native source. Inventions I and III-V represent divergent processes of using the polynucleotide, having different steps and/or different objectives.

Inventions A-N are structurally, chemically and biologically distinct sequences isolated from different sources and thus do not relate to a single general inventive concept. Since Applicant's claimed sequences encode structurally divergent SNF-4 species, they lack unity of invention.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
